SECTION 4. FIRST-AID MEASURES

**Inhalation:** Vapors may cause irritation to nose, throat and respiratory tract. High vapor concentrations may cause central nervous system depression which can lead to dizziness, weakness, headache and unconsciousness. Move individual to fresh air. If breathing is difficult, administer oxygen and seek medical attention.

**Eye Contact:** May cause eye irritation and/or conjunctivitis. Prolonged exposure may result in corneal burns, and/or other eye problems. If irritation occurs, move away from exposed area and flush eyes with water for 15 minutes. If irritation continues, seek medical attention.

**Skin Contact:** May cause mild skin irritation. Harmful if absorbed through skin. Remove contaminated clothing. Flush exposed area with water and wash with soap and water. If irritation occurs, seek medical attention.

**Ingestion:** Harmful or fatal if swallowed. Swallowing may cause abdominal irritation, gastrointestinal irritation, nausea, vomiting and diarrhea. Do not induce vomiting. If vomiting does occur, seek medical attention and contact poison control.

SECTION 5. FIRE-FIGHTING MEASURES

**Flash Point:** 181°C (358°F)  
**LEL:** No Data  
**UEL:** No Data
**Special Firefighting Procedures:** Normal fire fighting procedures may be used. Water may be used to cool containers to prevent pressure build up.

**Extinguishing Media:** Foam, CO2, Dry Chemical

**Unusual Fire and Explosion Hazards:** Material will not ignite or support combustion unless water has evaporated. Dried solids may burn.

### SECTION 6. ACCIDENTAL RELEASE MEASURES

**Steps Taken:** Dike areas with sand and absorb with an absorbent material. Dike areas with sand and absorb with an absorbent material.

**Special Precautions:** Protect from freezing, keep containers closed and stored in a covered area. Do not smoke or eat in work area. Keep away from children.

### SECTION 7. HANDLING AND STORAGE

**Handling and Storing Precautions:** Keep container closed and from freezing when not in use. Store in original container away from incompatible materials.

**Hygienic Practices:** As with all chemicals take all necessary precautions to avoid prolonged contact.

**Engineering Controls:** Facilities that are storing or using these materials should have proper ventilation equipment, and proper eyewash and safety shower facilities.

**Ventilation:** Provide sufficient mechanical ventilation to maintain exposure below TLV(s). Good general ventilation should be used.

**Respiratory Protection:** If engineering controls do not maintain airborne concentrations below recommended exposure limits, a NIOSH/MSHA approved respirator must be worn. Avoid prolonged or repeated breathing of vapors.

**Hand Protection:** Wear chemical resistant gloves, neoprene, plastic coated, etc.

**Eye Protection:** Chemical splash proof safety goggles in compliance with OSHA regulations. If splashing is possible, wear necessary protective clothing and boots. Follow hand and eye safety procedures.
